

GAMATICS:

Gamatics India Pvt Ltd (www.gamatics.in) is ISO certified company focusing on providing technology platform to support and promote grass root level talents.

Phase 1, we started sports focused e-commerce site and we deliver the sports gears and accessories to doorstep of players across the country.

Now sports persons in India in remote places need not visit cities to buy products! They can just order them online and get it delivered to their door step.

In Phase 2 , we have built technology platform for sports persons to highlight their achievements and showcase their performances.

This is a unique platform through which top talents can be identified and supported by bringing in CSR investments and Sports Brand Sponsorships.

We have launched STEPP program (<http://gamatics.in/stepp/>) in association with NSRCEL-IIM Bangalore which is expected to change the landscape of Indian Sports as grass root sports talents are celebrated under this program.

When STEPP program is rolled out in phased manner, it is expected to impact 300 million children in 8-10 years.

Sports is every kid's right and our focus is to enable the same !
